

▶▶▶▶ **EXPERIENCE – KNOWLEDGE – QUALITY** ▶▶▶▶

▶ **With experience to a success**

- We gained knowledge and experience through more than 20 years of direct cooperation with customers from the automotive and the agricultural machinery industry.
- We are a reliable and stable partner to our customers and therefore we have earned their trust.
- We direct our expertise and knowledge to the benefit of our customers.

▶ **Flexibility and short reaction time**

- We supply without errors and within the agreed deadlines.
- We are flexible and open.
- In case of quality problems, we respond immediately, but within 24 hours at the latest with measures.

▶ **Process orientation, risk management, »leadership«**

- The effectiveness of processes is measured by setting process goals, monitoring indicators, and in the event of non-achievement, we take an action.
- We identify risks, address them and take measures to reduce them.
- We motivate, reward and encourage employees to belong to the company.

▶ **Investment in the knowledge, new technologies, employees**

- We use modern machines and reliable measuring equipment and maintain them accordingly.
- We are constantly training our employees.
- We provide employees with professional and personal development and social security, and we also regularly inform them about the importance of meeting customer requirements and achieving goals.

▶ **Environmental protection and ecology**

- Concern for the protection of the environment and compliance with legislation in the field of ecology is an integral part of the quality policy.

▶ **We are committed to**

- Fulfilling customer requirements.
- Management of processes compliant with IATF16949 and continuous improvement of QM.
- Compliance with applicable legislation.
- 0-PPM strategy.

The suitability of the quality policy is checked by a management review.
